

# Summary of Results

## External Quality Assessment of Water Microbiology Recreational and Surface Water Scheme

Distribution Number: S123

Sample Numbers: S123A, S123B

Distribution Date:	<b>April 2025</b>
Results Due:	<b>09 May 2025</b>
Report Date:	<b>23 May 2025</b>
Samples prepared and quality control tested by:	<b>Divya George Afifa Halim Nafeesa Hussain Cansev Katar Sabine Naujokat Zak Prior Jake Videlefsky</b>
Data analysed by:	<b>Joanna Donn Nita Patel</b>
Report compiled by:	<b>Joanna Donn Nita Patel</b>
Authorised by:	<b>Nita Patel</b>

This report must not be reproduced without permission of the organisers.

For further information on the scheme please refer to:

**Scheme Guide:** <https://www.feptu.org.uk/schemes/scheme-guide/>

**Guide to Scoring and Statistics:** <https://www.feptu.org.uk/schemes/scoring/>

**General guidance for z-scores:**

Participants' enumeration results are converted into z-scores using the following formula:

$$Z = \frac{(x_i - X_{pt})}{\sigma_{pt}}$$

$x_i$  = participants' result expressed (expressed as a log<sub>10</sub> value)  
 $X_{pt}$  = assigned value (participants' consensus median (expressed as a log<sub>10</sub> value)  
 $\sigma_{pt}$  = the fixed standard deviation for the examination (calculated by FEPTU)

The  $\sigma_{pt}$ -value expresses the acceptable difference between the individual participant's result and the participants' consensus median. The  $\sigma_{pt}$ -value used for calculating z-scores for all parameters in the Recreational and Surface Water Scheme is 0.35. A guide to interpreting z-scores follows, although laboratories must interpret their scores in the context of their own laboratory situation.

z = -1.99 to +1.99                    **satisfactory**  
z = -2 to -2.99 or +2 to +2.99    **questionable**  
z = < -3.00 or > + 3.00            **unsatisfactory**

It is usually recommended that z-scores exceeding +/-2 are investigated to establish the possible cause. As a general rule, UKHSA recommends that all questionable and unsatisfactory results are investigated.

**FEPTU Quality Control:** To demonstrate homogeneity of the sample, a minimum of 10 LENTICULE® discs, selected randomly from a batch, are tested in duplicate for parameters requiring enumeration.

To demonstrate stability of the sample, a minimum of six LENTICULE discs, selected randomly from a batch, are examined throughout the distribution period for enumeration parameters.

UKHSA uses methods stipulated in the Microbiology of Recreational and Environmental Waters (2000) and the DWI's series of documents: The Microbiology of Drinking Water (2002) - Methods for the Examination of Waters and Associated Materials.

The FEPTU results are used for guidance in the preliminary intended results notification, letters are posted on the website immediately after every distribution; electronic notification of their availability is sent to all participants.

Refer to section 19.0 of the Scheme Guide if you have experienced difficulties with any of the examinations .

<https://www.feptu.org.uk/schemes/scheme-guide/>

Participants are reminded that reporting an incorrect or false negative results for water samples could have serious public health implications.

Please contact FEPTU staff for advice and information:

**Accreditation:** UKHSA Water EQA Scheme for Recreational and Surface Water is accredited by the United Kingdom Accreditation Service (UKAS) to ISO/IEC 17043:2010.

0006

## Sample: S123A

Swimming pool water

**Contents:** *Staphylococcus aureus* (22) (wild strain), *Escherichia coli* (76) (NCTC 12950), *Enterobacter cloacae* (30) (NCTC 10005), *Enterococcus faecium* (60) (wild strain), *Pseudomonas aeruginosa* (64) (NCTC 10332), *Staphylococcus hyicus* (87) (NCTC 10350), *Kocuria kristinae* (30 per mL) (NCTC 11038)

### Expected Results:

All counts are expressed as colony forming units (cfu) per 100mL except the colony count at 37°C/24h which is cfu per mL.

The fixed standard deviation value ( $\sigma_{pt}$  value) used for calculation of the z-scores is **0.35** for all parameters.

Parameter	Coagulase positive staphylococci	Coliform bacteria	<i>Escherichia coli</i>	Enterococci	<i>Pseudomonas aeruginosa</i>	Total staphylococci	Colony Count 37°C/24 h	Colony Count 37°C/48 h
FEPTU median	20	1.04x10 <sup>2</sup> (2.01 log <sub>10</sub> )	76 (1.88 log <sub>10</sub> )	60	64	106	26	30

## Sample: S123B

Swimming pool water

**Contents:** *Staphylococcus aureus* (66) (wild strain), *Escherichia coli* (52) (wild strain), *Enterococcus faecalis* (33) (NCTC 5957),  
*Pseudomonas aeruginosa* (36) (wild strain), *Pediococcus pentosaceus* (57 per mL) (wild strain)

### Expected Results:

All counts are expressed as colony forming units (cfu) per 100mL except the colony count at 37°C/24h which is cfu per mL.

The fixed standard deviation value ( $\sigma_{pt}$  value) used for calculation of the z-scores is **0.35** for all parameters.

**S123B: Colony Count 37°C/48 h**

### **Sample specific comment**

#### **S123A – *Pseudomonas aeruginosa***

A Kolmogorov–Smirnov test showed that the data for this examination was not evenly distributed. Therefore the 11 laboratories reporting a count outside the expected range have been awarded a score of 2. Participants are advised to review their z-scores with caution.

#### **S123B – Colony count 37°C/24 h**

A Kolmogorov–Smirnov test showed that the data for this examination was not evenly distributed. The standard deviation was also wide, the ten laboratories reporting a count outside the expected range have been awarded a score of 2. Participants are advised to review their z-scores with caution. This strain of *Pediococcus pentosaceus* in the sample gave variable grow pattern (as shown in the graph on page 18) when read at 24 hours.

### **General comments**

Method based presentation of enumeration results:

Participants are advised if less than 10 laboratories report a result for a method, no data are shown for the Median, Robust SD and the Range Reported in the 'Method based presentation' tables. Numbers shown in the 'Excluded Results' column are laboratories that reported a censored value.

If you do not return a result for a distribution, you will not be able to view all the participants' results data in your individualised report. Please contact us if you require this information on [foodeqa@ukhsa.gov.uk](mailto:foodeqa@ukhsa.gov.uk).

### **New website**

We are pleased to announce the launch of our new website: <https://www.feptu.org.uk/>. Please refer to this website to obtain the latest information for your proficiency testing.

### **Information of importance**

To understand more about the proficiency testing schemes, please use the following links for information on:

1. Report format explained: [Annotated report](#)
2. Performance rating: [Performance-over-time](#) and [Scheme guide](#) (section 16.0)
3. Scoring and statistics used: [Scoring information and stats](#)
4. Homogeneity and stability: [Scheme guide](#) (section 9.0)
5. Complaints and appeal process: [Scheme guide](#) (section 20.0 and 21.0)

For further information about the operation of the service including confidentiality and terms of participation, please refer to the Scheme Guide: [Scheme guide](#)
