

## **Food and Environmental Proficiency Testing Unit**

Laboratory identification no. (check): <Lab No>

Dispatch date: 10 March 2025

Final date for return of results: 11 April 2025

Contact details:

The Organisers - FEPTU
UK Health Security Agency
61 Colindale Avenue,
London, NW9 5EQ, UK.
Tel: +44 (0) 20 8327 7119

e-mail: foodeqa@ukhsa.gov.uk

UKAS PROFICIENCY TESTING

0006

Results to be returned on-line through the website: www.phe-eqa.org.uk/

You will need your log-in details for this process.

Download the on-line web instructions: <u>Information on uploading results - Food and</u> <u>Environmental Proficiency Testing Unit</u>

PLEASE NOTE: Recommended dilutions for testing the samples are provided on this form. Please consider this when entering your on-line results and ensure the results are entered in the correct dilution rows, along with the correct MPN

Shellfish - Food and Environmental Proficiency Testing Unit

Shellfish Scheme Request/Report Form						
Distribution No: SF079	Sample numbers: SF0166					
Download the sample instruction sheet. Video on sample processing:	Shellfish instruction sheet Sample processing - Shellfish					
Download the safety data sheet:	Safety Data Sheet - LENTICULE					
If you cannot examine any of these samples return your res	ults as 'Not examined'					
Analyse sample material for E. coli (in duplicate) and Salmo	nella spp. (one replicate)					
Please indicate if your laboratory is an 'Official Control Labo Yes/No	ratory' for your Country for Shellfish testing					

## E. coli enumeration

Droporation	It is recommended a minimum of 4 dilutions are prepared for each sample examined				
Preparation	Analyse each sample in duplicate				
D	Report <i>E. coli</i> as MPN per 100g				
Reporting result	Report tube combination used to determine MPN value from MPN table / calculator (report results from all tubes used) (e.g. 532 or 5320°)				

<sup>\*</sup> **Note**: For laboratories undertaking official control analysis of *Escherichia coli* in live bivalve molluscs to satisfy the requirements of Regulation (EC) 854/2004 and Regulation (EU) 2015/2285 should follow ISO 7218:2007/Amd 1:2013 which states 'In any circumstance when more than three dilutions are made, it is essential that all measured data values be used. It is not scientifically correct to "select" any combination of values on the premise that these values are more "correct" than other combinations. The results from all possible combinations of positive tubes should be recorded and the MPN calculator (http://standards.iso.org/iso/7218/) used to derive MPN values'.
